

# The Federal Sector is Unique

## Offering Distinct Opportunities and Challenges for Owners and Industry

From hospitals to highways and everything in between, there's an incredible diversity in federal projects and the approaches agencies use to fulfill their singular mandates. That's why it's important to bring together the design-build industry and federal Owners for a day of education, brainstorming and networking.

### FINDING ANSWERS

What works? What doesn't? How can we work together to improve federal project delivery and unleash the innovation needed to deliver exceptional design-build projects while also providing maximum value to the American taxpayer?

### BUILDING ON SUCCESS

For many years, the Design-Build Institute of America has worked to be a catalyst for innovation, problem-solving and education for every member of federal design-build teams. Our annual [Federal Owners' Forums](#) have brought together diverse groups of agency leaders to brainstorm solutions to the unique challenges facing federal project delivery teams from procurement to delivery. Whether it's right-sizing risk, assessing culture and its impact on collaboration, standardizing the implementation of FAR or finding and keeping good talent, we know there are opportunities to improve federal project delivery. Let's find the ways to maximize design-build project success in the federal sector delivering greater value to the American taxpayer.

## 2019 Federal Design-Build Symposium

As the nation's only design-build event targeted to the federal sector, the [2019 Federal Design-Build Symposium](#) offers a unique opportunity for Owners and industry alike. This one-day event features:

- Case studies on highly successful design-build projects
- An overview of upcoming design-build projects in the Federal sector
- Best practices for developing and responding to a Federal solicitation, including how to become an Owner of choice
- And so much more...
