

Designated Design-Build Professional® CERTIFICATION

DBIA certifications provide the only measurable standard to evaluate a professional's understanding of Design-Build Done Right®. DBIA's curriculum-based program educates Owners as well as designers and builders on team-centered approaches that are essential to effective design-build. Through **education, experience and examination**, certification candidates demonstrate mastery of Design-Build Done Right®.

Types of Certification

DBIA offers two different Designated Design-Build Professional® Certifications. Which DBIA certification you attain depends on various factors including experience, education and professional background. See which one is right for you (view [requirements](#) for each designation):

- **Designated Design-Build Professional (DBIA®)**
For industry practitioners meeting the required demonstrated hands-on design-build experience. "Hands-on" is defined as playing an active role with direct involvement in the application of design-build best practices and principles during procurement, design phase and construction.
- **Designated Associate Design-Build Professional (Assoc. DBIA®)**
For industry practitioners who may not be able to demonstrate the required hands-on design-build experience but who meet other designated requirements.

READY TO START THE CERTIFICATION PROCESS? HERE ARE THE STEPS TO BEGIN YOUR CERTIFICATION JOURNEY:

STEP 1: APPLY

DBIA recommends you submit your Certification Application to the Certification Board for approval as your first step.

Designated Design-Build Professional[®]

VALUE OF CERTIFICATION

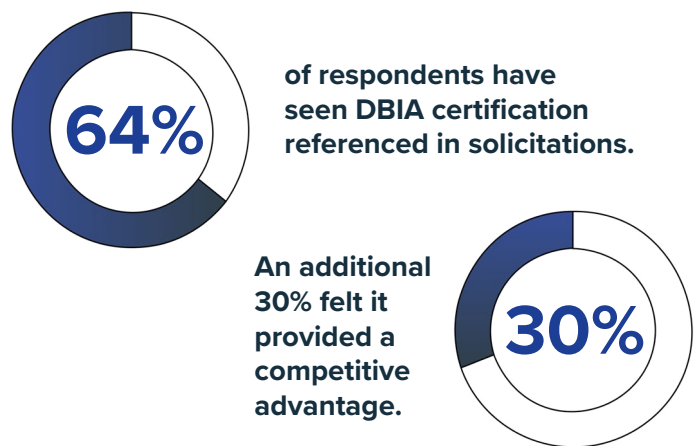

As the use of design-build continues to grow, more Owners are looking for design-build certified professionals to deliver their projects. Many Owners award points or additional consideration in solicitations for teams that have DBIA certified professionals as it is a way to ensure an understanding of Design-Build Done Right[®] best practices. According to a recent survey conducted by DBIA of our certified credential holders:

Reasons People Become Certified

DBIA Certification Referenced in Solicitations
