

About the DBIA Certification Examination

Prometric testing centers nationwide provide both in-person exams and remote options to take the exam using a secure process that provides proctored testing. The 100-question, 5 topic certification exam measures a candidate's mastery of design-build best practices and application. **The passing score is 72% and above.**

The exam covers the following topics:

- *Guiding Principles (8%)*
- *Foundations of Design-Build Done Right (8%)*
- *Procuring Design-Build Services (30%)*
- *Contracting for Design-Build Services (24%)*
- *Executing Design-Build Projects (30%)*

Online Exam Prep Course

Exam Prep webinar is available on your DBIA "my dashboard". Once you login to your DBIA account and access your educational portal, click on the title of this workshop, and see the code of conduct as the first product of your workshop and the exam prep webinar towards the bottom of the page (remember to clear those filters so it appears on the dashboard).

In addition to the course materials from the Certification Workshop, we also recommended reading the updated [Universal Best Practices](#) which further reinforces the best practices and implementing techniques discussed in class and reading through the following DBIA documents in preparation for your exam:

- [DBIA Primer – Project Delivery](#) (fully understand the unique differences between each delivery system)
- [Position Statement DEI](#) (fully understand the core principles)
- [Position Statement VDC](#) (fully understand the position)
- [Deeper Diver Progressive Design-Build](#) (fully understand the PDB procurement process and unique contract issues)
